PERSONAL PROJECTS

PORTFOLIO WEBSITE

- ▣ I completed my personal portfolio webpage by using HTML and CSS . It is a front-end responsive web project.
- ▣ The webpage consists of four main sections: About, Blog, Projects, and Contact. The navigation bar is always at the top of the viewport. You click on links to navigate to different sections of the page. I used media queries for mobile phones with smaller displays to adjust the webpage layout.

Google Clone

- ▣ I have built this web search application with React and features for the Front-End & Almost fully Responsive Design and knowledge about FireBase.
